

GD Engineering

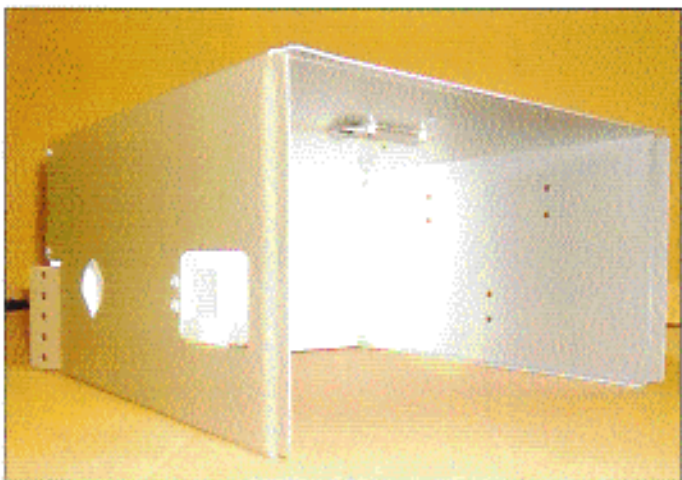

A Stainless reputation in metalwork

CAD/CAM Prototype Development

Allowing us the flexibility for large or small batches and to make any changes efficiently depending on clients needs.

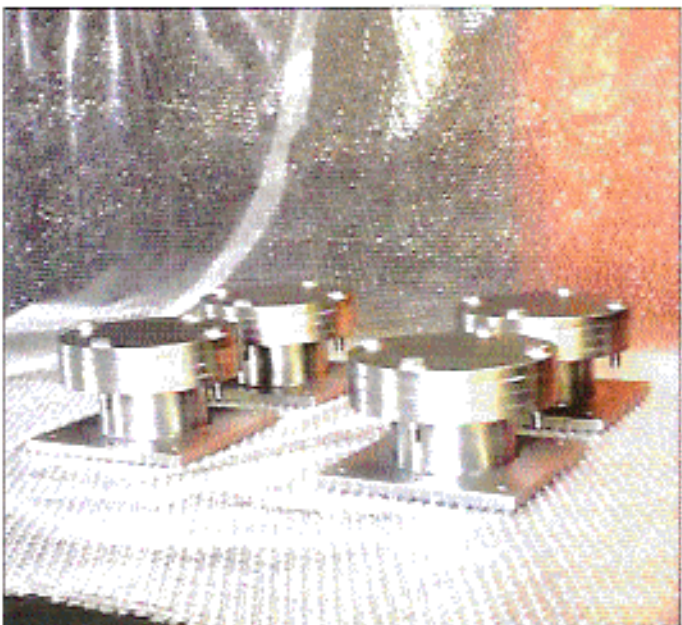

For clients in a wide variety of industries including inkjet, pharmaceuticals, printing, robotics, food stuffs, communications and leisure.

Specialising in R&D and Prototyping. Our full CAD/CAM facility enables us to work from clients' drawings or DXF files.

Delivering quality products on time and at a competitive price.

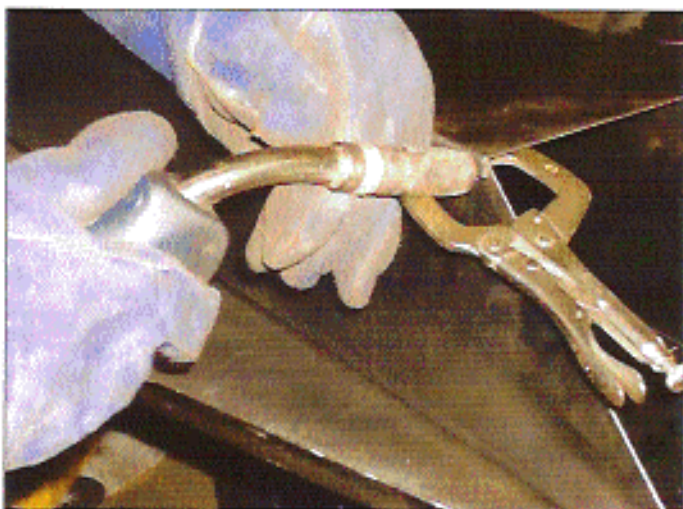

Interior Metalwork

The Bar top and radiator covers for the revamp of this bar were a fun and funky application of our skills.

Our highly skilled on-site team of fabrication engineers compliments the sheetmetal processes. Allowing us to offer a complete manufacturing service for our clients.

Sheet metal can make a great interior design statement or be practical and sterile in a laboratory or kitchen environment.

We are able to work from sketches or samples right through to detailed technical drawings.

Exterior Metalwork and on site Installations

Dedicated Manufacturing Units allow us to work with a variety of materials without fear of contamination.

And also to offer bespoke exterior steel and iron works including gates, railings, rose arches, fire escapes and staircases.
